Subject - Java Programming

Ans①
```java
import java.i.o*;

public class FileMerge
{
    public static void main(String[] args) throws Io Exception
    {
        print writer pw = new PrintWriter ("File3 . txt");

        Buffered Reader br1 = new Buffered Reader (new File Reader ("file1.txt"));
        Buffered Reader br2 = new Buffered Reader (new FileReader "(File2.txt"));

        String line 1 = br1. read line ();
        String line2 = br2 read line ();

        while (line2; =null || line2! =null)
        { if (line 1 ! = null )

            { pw. print ln( line );
              line 2 = br1. read line();

            }
            if (line 2 ! = null)

            { pw. print ln( line 2);
              line 2 = br2. read line();
            }
            2
            3
            pw . flush();
```

```java
br1.close();
br2.close();
pw.close();
System.out.println("Merged file1.txt & file2.txt alternatively into file.txt");
}
}
```
