Q=2]

Source Code:

```java
public class Person
{
        protected String name;
        public Person (String name)
        {
            this.name = name;
        }
        public String getName ()
        {
            return name;
        }
        public String toString ()
        {
            return "PERSON[Name =" + name + "]";
        }
}

public class Employee extends Person
{
        private double annualSalary;
        private int yearOfJoining;
        private String nationalInsuranceNo;
```

```java
public Employee (String name, double annualSalary,
    int yearOf Joining , String nationalInsurance No)
{
        super(name);
        this. annualSalary = annualSalary;
        this. yearof Joining = yearOf Joining ;
        this. nationalInsurance No = nationalInsurance no;
}
public double get AnnualSalary ()
{
            return annualSalary;
}
public int getYear of Joining ()
{
            return YearOf Joining;
}
public String get NationalInsurance No()
{       return nationalInsuranceNo;
}
public String getName()
{
            return name;
}
public String toString ()
{
        return "Employee Details are as fallaws:
    - \n Name=" +name + "\n Year Of Joining = "
    + year of Joining + "\n Annual Salary =" + annualSalary
    + "\n National Insurance No=" + nationalInsuranceNo;
}  }
```

```java
public class TestEmployee
{
    public static void main (String[] args)
    {
        Employee emp = new Employee (" John",
            7000000, 2020, "abcde");
        System.out.println (emp);
    }
}
```
